INT. J. COMPUTER INTEGRATED MANUFACTURING, 1990, VOL. 3, NO. 6, 381–382

Index of authors (with titles)

Boelzing, D.: Use of computer-based factory automation (CBFA) in West German companies, 112

Boucharlat, G., Dimitriadis, B., Herault, D., Raabe, G., Roy, F., Thenoz, Y., Zur Verth, S., and Weijtens, C.: Basic technologies for high-performance solid-state image sensors for CIM applications, 261

Bowden, R., see Lyons, G. J.

Bray, A. D., see Herbert, P. J.

Busby, J. S., Hey, D. G., and Hutchinson, D.: Linking computer systems in a manufacturing company, 73

Canessa, D. G., see Waller, D. N.

Chandraker, R., West, A. A., and Williams, D. J.: Intelligent control of adhesive dispensing, 24

Dimitriadis, B., see Boucharlet, G.

Duggan, J., see Lyons, G. J.

Faillot, J.-L.: Computer-aided design of advanced control algorithms for industrial robotics: an overview of ESPRIT project SACODY, 186

Fard, N. S., and Sabuncuoglu, I.: An expert system for selecting attribute sampling plans, 364

Farhoodi, F.: A knowledge-based approach to dynamic job-shop scheduling, 84

Fauvel, O. R., see Norrie, D. H.

Foster, C. J., see Waller, D. N.

Gaines, B. R., see Norrie, D. H.

Göbel, K.-J., Hidde, A., and Schwartz, R.: Concept definition of a logistics standard interface for CIM implementations, 289

Herault, D., see Boucharlat, G.

Herbert, P. J., Hinde, C. J., Bray, A. D., Launders, V. A., Round, D., and Temple, D. M.: Feature recognition within a truth maintained process planning system, 121

Hey, D. G., see Busby, J. S.

Hidde, A., see Göbel, K.-J.

Hinde, C. J., see Herbert, P. J.

Hitomi, K.: Manufacturing systems engineering: the concept, its context and the state of the art, 275

Holbrook, A., and Sackett, P.: Rationalization of product structure achieved by part count minimization, 335

Hutchinson, D., see Busby, J. S.

Isenberg, R., see Meyer, W.

Ishii, K., and Misra, S.: Uncertainty management in intelligent task planning of mobile robots, 13

Jones, A., and Saleh, A.: A multi-level/multi-layer architecture for intelligent shopfloor control, 60

Jorysz, H. R., and Vernadat, F. B.: CIM–OSA Part 1: total enterprise modelling and function view, 144

Jorysz, H. R., and Vernadat, F. B.: CIM–OSA Part 2: information view, 157

Judd, R., see Parunak, H. Van Dyke

Kanal, L. N., see Yang-Geng Huang

Klittich, M.: CIM–OSA Part 3: CIM–OSA integrating infrastructure—the operational basis for integrated manufacturing systems, 168

Launders, V. A., see Herbert, P. J.

Leuridan, J., see Van Maanen, J.

Lyons, G. J., Duggan, J., and Bowden, R.: Project 477: pilot implementation of a production activity control (PAC) system in an electronic assembly environment, 196

MacConaill, P.: Introduction to the ESPRIT programme, 140

Mandel, K.: Graphical process description—views and diagrams, 314

Meyer, W., and Isenberg, R: Knowledge-based factory supervision: EP 932 results, 206

Ming-Hwang Yu, see Rong-Kwei Li

Misra, S., see Ishii, K.

Nof, S. Y., see Rajan, V. N.

Norrie, D. H., Fauvel, O. R., and Gaines, B. R.: Object oriented management planning systems for advanced manufacturing, 373

Pao-Long Chang, see Sheh-Pang Wu

Parunak, H. Van Dyke, and Judd, R.: Sharpening the focus on intelligent control, 1

Pluym, B. van der: Knowledge-based decision making for job-shop scheduling, 354

Raabe, G., see Boucharlat, G.

Rajan, V. N., and Nof, S. Y.: A game-theoretic approach for co-operation control in multi-machine workstations, 47

Richtscheid, A.: The use of an identification system for locating and tracking freight cars, plus its further development into integrated routeing planning information system, 234

Rong-Kwei Li, and Ming-Hwang Yu: A framework for prismatic part-data generation-unit machined loop concept, 96

Round, D., see Herbert, P. J.

Roy, F., see Boucharlat, G.

Sabuncuoglu, I., see Fard, N. S.

Sackett, P., see Holbrook, A.

Saleh, A., see Jones, A.

Salonna, R.: Scheduling and planning of electronics manufacturing operations: a case study, 343

Schwartz, R., see Göbel, K.-J.

Sheh-Pang Wu, and Pao-Long Chang: The synthetic index algorithm: an improved cluster analysis procedure for machine cell formation, 299

Temple, D. M., see Herbert, P. J.

Thenoz, Y., see Boucharlat, G.

Tripathi, S. K., see Yuan-Geng Huang

Van Maanen, J., and Leuridan, J.: Methods for exchange of finite element analysis data and integration of finite element analysis and prototype testing, 181

Vernadat, F. B., see Jorysz, H. R.

Wagner, C. C.: The implications of natural language structure on the control of intelligent robotic systems, 35

Wagner, R., see Waller, D. N.

Waller, D. N., and Canessa, D. G.: The application of CIM to welded fabrication, 241

Waller, D. N., Foster, C. J., and Wagner, R.: Real-time imaging for arc welding, 249
